Simulation in Transvaginal & Transabdominal Ultrasound
REAL PATIENT SCANS
- Over 1,000 real patient scans across a number of specialities
- Facilitates all levels of learning
- Ability to create custom training programs

CURRICULUM-BASED
- Teach basic probe manipulation through to advanced diagnostic skills
- Assess skills with normal, abnormal and pathological real patient scans

SUPPORTED LEARNING
- Built-in virtual tutor replicates learning with an expert
- Support to acquire images, recognize structures, and make measurements correctly
- Easily toggle the tutor on and off

REALISTIC EXPERIENCE
- Real-feel scanning experience
- Virtual patients with realistic landmarks
- Replaces the need for multiple mannikins

CART-BASED OR COMPACT SYSTEM
- Available on an ergonomic cart with mobile scanning haptic; or as a compact, desktop system
ScanTrainer offers a unique self-directed learning experience. With structured curriculum-based teaching, real patient scans and haptic feedback, ScanTrainer gives real-time assisted guidance and facilitates assessment through measurement of key performance metrics - all in one comprehensive system.

A fully comprehensive educational experience. From the basic probe manipulation to diagnostic skills assessment, the curriculum-based program helps students develop hand-eye coordination, pattern recognition, 3D - 2D spatial awareness, anatomy and pathology recognition; providing full anatomy real patient scans concurrent with all planes probe movement.

Trackable, Flexible and Customisable Learning. The learning management system allows tutors to keep track of trainees’ progress and set up customised learning programs. Available for systems on the cloud, the case generator enables tutors to upload their own scans and create their own patient cases.

“Since implementing ScanTrainer into our programs, not a single student has failed the transvaginal obstetrics and gynaecology module.”

Naomi Brown.
Senior Lecturer and Ultrasound Course Lead, University of the West of England
Intelligent Ultrasound is unlocking ultrasound for everyone with real-time support from the classroom to the clinic. Get in touch today:
